APPLE II/GS

Exploring Apple GS/OS and ProDOS 8
By Gary B. Little, 1988. Published by Addison-Wesley.
GS/OS™ is the new versatile and powerful operating system for the Apple IIGS. Built for speed, this true 16-bit operating system takes full advantage of the machine's 65816 microprocessor. Exploring Apple GS/OS and ProDOS 8 presents an in-depth analysis of the inner workings of both the GS/OS and ProDOS 8 operating systems. Written for intermediate-to-advanced Apple II programmers.
PGBR01 $14.95 $1.00

The Programmer's Online Compannion
From Byte Works, Inc.
The first Database reference utility for the Apple IIGS that allows you access to vital programming informaion from within your development system. Developed specifically for use with the Apple Programmer's Workshop (APW) language environments, it can be used with any development system that can access Classic Desk Accessories.
The Database includes hundreds of Toolbox entries and can be added to and modified to create a fully customized programming utility. In addition, the database includes brief explanations of each of the toolbox calls, providing a "quick reference" to the use of teh Apple IIGS Toolbox fro software development.
PGA407 $32.95 $1.00

Programming the Apple IIGS in Assembly Language
By Ron Lichty and David Eyes, 1988. From Brady Computer Books.
Whether you are a professional programmer or hobbyist, this is the book you've been waiting for. Programming the Aple IIGS in Assembly Language is an easy entree to the 16-bit nature of the 65816 and the windowed world of the IIGS. Included is an overview of the machine and its processor; a tutorial on the Aple IIgs Programmer's Workshop (APW), the 65816, and the Apple IIgs Tool Sets; and in addition you are provided with example code which can be used in your own development projects. Finally a reference section provides a place to turn for the details—both of assembly language and of the tools.
PGA406 $17.95 $1.00

HyperStudio-*From Roger Wagner Publishing, Inc.*
A **hot** new item for the IIGS. With the popularity of Apple's HyperCard for the Macintosh, and the desire of the IIGS users to combine graphics, sound, and text, HyperStudio is the best way to integrate all of this on your IIGS. HyperStudio uses the analogy of index cards, on which you can place graphics, text, etc. Buttons are then attached to the card and linked to the other cards so that the user can move to any other card based on information and an action in the current card.
In addition to the HyperStudio program and a collection of stacks to help you get started, you receive three other programs plus and external, amplified loudspeaker, a microphone, and a sound digitizer circuit board. To help you along, sample applications and clip art are included in the package.

MACINTOSH SOFTWARE

Wingz-*From Informix.*
Wingz is the most powerful and versatile spreadsheet for the Macintosh. Wingz lets you easily combine numbers, text, graphs, charts, clip art and illustrations on a single screen, and print to a single page. Wingzunique charting funcions allow you to automatically generate full-color graphs—including 3-D charts with the click of a mouse. Wingz includes object drawing tools and a full functioning textfield feature that makes int simple to enter and manipulate text.
Built in functions include:
•18 Business functions
•23 Date/Time functions
• 9 Logical functions
•10 Statistical functions
•10 Database functions
•24 Text functions
•16 Spreadsheet functions
•34 Numeric functions
Wingz supports the Macintosh operating system and will run under System version 4.1 (Finder 5.5) or higher. Wingz also runs under MultiFinder and is network ready. Wingz requires a Mac Plus, SE or II with one megabyte of memory, and two diskette drives or one hard disk. Two Mb of memory is suggested when running MultiFinder.
SMMD95 $320.00   *$5.75*

MacApp Package
From MacApp Developer's Association
This collection includes: MacApp Goodies Volume #1, Useful Tools & Scripts #1, Entity/Relations Educational Disk, "Two Match" Educational Disk, and MacApp Browser, all in one convenient package for less than if you bought each individually.
SMMP06 $250.00 $3.00
