ACKNOWLEDGEMENTS

Blankenship BASIC was programmed by John Blankenship and Cecil Fretwell of A.P.P.L.E., and that software is copyright © 1984-1987, 2018 by John Blankenship.

This new book, produced in coordination with John Blankenship, is copyright by A.P.P.L.E.. No claim to copyright over *Blankenship BASIC* is created outside of those portions created by A.P.P.L.E..

Thanks to John Blankenship for the original manual, Robert Knepp for the ProDOS version of the software, and Bill Martens for the DOS 3.3 version of the software.

The Cover and Book were designed by Brian Wiser.

About the Author

John Blankenship

John Blankenship taught programming, robotics, and engineering technology at DeVry University for 33 years. He holds a Masters Degree in Electronic Engineering Technology from Southern Polytechnic State University, an MBA from Georgia State University, and a BSEE from Virginia Polytechnic State University.

During his early teaching years, John created *Blankenship BASIC* for the Apple II computer and other programs like *Speech Development System*. He wrote magazine articles for publications such as *Byte*, and numerous Apple books including *Apple House*, *Robotic Arm Projects*, and *Structured BASIC Programming in BBASIC*.

After retiring from DeVry, he wanted to develop better methods for teaching and motivating precollege students. John, along with colleague Samuel Mishal, developed *RobotBASIC* for Windows – a programming language ideally suited to the educational environment. And, because of their desire to contribute to the Science, Technology, Engineering and Mathematics (STEM) movement, John and Sam continue to make *RobotBASIC* available to schools, teachers, and students absolutely free from RobotBASIC.org.
