ACKNOWLEDGEMENTS

We would like to thank Robert C. Clardy for his support and contributions to this book, including scanning manuals and loaning original disks. Produced in coordination with Robert C. Clardy.

The included manuals and covers were originally published by Synergistic Software between 1978 and 1982 and are copyright © NW Synergistic Software, Inc.

The modified art on the front cover was originally created by Judy Swedburg for the Synergistic game "Odyssey: The Compleat Adventure."

The Cover and Book were designed by Brian Wiser.

PRODUCTION

Brian Wiser → Design, Editing, Layout, Proofreading, Scanning, Project Lead

Bill Martens → Original Concept, Proofreading, Screenshots, Scanning

About Robert C. Clardy

Robert C. Clardy has been a computer game developer and programmer for home desktop computers and video game machines during the entire lifespan that those devices have existed – over 20 years from the late 1970s through the 1990s and beyond. His experiences encompass birth pains, growth pains, triumphs, failures of the industry, and the many businesses that sprang up and thrived or died during those years.

In early childhood, Robert developed a habit of regular change, always pursuing some new experience or adventure while leaving the familiar behind. This habit encouraged a lifelong fondness for adventures, whether those are in books, movies, games, or software. More importantly, it also encouraged adventures with new business models as well as committing to new computers and industries which did not exist even a short time before.

In 1979, Robert quit his stable and secure-career job with Boeing Aerospace, founded Synergistic Software, and devoted his life to writing software for the Apple II as well as other new home desktop computers as they appeared. Robert wrote adventure games first, but later, the search for change encouraged him to also write utility, business, and educational software.

Robert learned about, programmed, and produced software for many desktop computers and video game machines, as they were released and had their brief time in the sun. Synergistic's computer software development included systems such as the Apple II, Apple IIGS, Atari 800, Atari ST, Commodore VIC-20, Commodore 64, Commodore Amiga, Macintosh, and the IBM PC, along with video game systems such as the Super Nintendo and Sega Genesis.

Synergistic Software was well-known for their variety of games, including: *Dungeon Campaign*, *Wilderness Campaign*, *Bolo*, *Crisis Mountain*, *Odyssey: The Compleat Apventure*, *Apventure to Atlantis*, *Microbe*, and many others.

Beyond Synergistic's own published games, Robert adapted, produced, and programmed noteworthy computer titles published by other companies such as: *Aargh*, *New York Warriors*, *Sidewinder*, *Thexder*, *War In Middle Earth*, *Spirit of Excalibur*, *Conan: The Cimmerian*, and many others. Memorable arcade game adaptations include: *Donkey Kong Jr.*, *Jungle Hunt*, *Pole Position*, and *Pitstop II*.

Robert's years running Synergistic Software spanned the birth, growth, and total explosion of an industry that had not even existed before that time. Companies and industry giants came and went during the 20 years that Synergistic participated in every aspect of the industry, with many of the major business players of the time. He produced software not only for his own company, but also for other major publishers such as Atari, Activision, Blizzard, Electronic Arts, Epyx, Sierra On-Line, Mindscape, Sony Imageworks, Time Warner, and Virgin Games.

In 1997, Robert quit his long time job with Synergistic Software and started new ventures in a virtual office world that was just then becoming practical. Email, Skype, and sharing files online permitted a business that included principles from around the world, working together to produce products that were marketed online to a download-centric audience. Again, this was a new frontier of technology businesses that Robert surfed and enjoyed.

That pursuit of new experiences colored the rest of Robert's life as well, as he sought out personal adventures in the real world. While never the most extreme at anything he tried, Robert has always been comfortable with where he was, what he did, and the sheer exuberance that comes from trying new things and finding he truly loved every minute of it. If there is a motto for his life, it would have to be, "That was fun, what's next?"
